PROFILE

Senior iOS Engineer and Mobile Architect with 20+ years in software, 15+ building mobile products in regulated, high-stakes domains: aviation (Lufthansa Group), digital banking (Apple Pay/MBWay), and IoT (Bosch, Electrolux).

Currently engineering the Lufthansa Group multi-tenant iOS platform — one codebase, five airline apps, 5M+ monthly active users, 99.9%+ crash-free. Architected a cross-platform video player SDK adopted by 8 apps with 120k+ active users, eliminating duplicated development across teams.

Shipped AI to production (LLM-backed contextual help) and practice disciplined AI-augmented delivery: agent-assisted development gated by SonarQube quality/security gates and CI/CD, plus spec-driven development with Kotlin Multiplatform.

Former engineering manager (20-person org, 8 projects; MBA in Project Management) who chose the IC track — I build the platforms other engineers ship on.

CORE SKILLS

- **iOS:** Swift, SwiftUI, UIKit, Combine, MVVM, VIP Clean Swift, XCTest, SPM, XCFrameworks
- **Cross-platform:** Kotlin Multiplatform, Compose Multiplatform
- **AI-augmented delivery:** GitHub Copilot (agent mode), Claude Code, spec-driven development, LLM API integration
- **Quality & delivery:** SonarQube, Azure DevOps, Fastlane, Firebase (Analytics, Crashlytics), CI/CD
- **Architecture & leadership:** SDK/platform design, multi-tenant architecture, code review, technical mentoring

PROFESSIONAL EXPERIENCE

LUFTHANSA GROUP (VIA AUBAY), REMOTE, *PORTUGAL / GERMANY*
Globally operating aviation group.

Nov-2024 / Present

SENIOR IOS ENGINEER

Multi-tenant iOS platform: one codebase powering five airline apps (Lufthansa, SWISS, Austrian, Brussels Airlines, ITA Airways) — 5M+ monthly active users, 99.9%+ crash-free, biweekly releases across five App Store storefronts (flagship 4.7★, 87k+ ratings), within a ~33-engineer iOS organization. The platform serves customers of a group carrying 135M+ passengers/year.

- Built the Customer Service handover flow — profile, passenger, flight data, and selected help topics delivered to agents at call start, reducing call handling costs.
- Shipped AI to production: built the integration with an internally hosted LLM backend surfacing contextual help topics from app, user, and flight state.
- Hardened quality and security for a ~280k-LOC codebase: configured SonarQube quality/security gates and lead ongoing coverage and quality initiatives.
- Reduced connection errors on unstable airport networks by improving local data caching.

SENIOR IOS ENGINEER / TECH LEAD

Part of the IOS team with Swift, responsible for creating new features, app maintenance, team development, improvement, and project organization.

- Mobile technologies: RxSwift, RxDataSource, RxCocoa, Moya, SnapKit, TinyConstraints, ViewCode for UI, Firebase, Sentry, Fastlane, Sourcery, Xcode Templates.
- Patterns/Architecture: VIP Clean Swift.
- Other Tools: Figma, Azure DevOps.

BOSCH (VIA OLISIPO) HYBRID, PORTUGAL
Global Thermotechnology Industry.

Nov-2021 / Apr-2023

IOS ENGINEER

Part of the IOS team that develops and maintains a multi-branding application, connected with Bosch/Vulcano smart appliances such as air conditioners, heat pumps, boilers, underfloor heating, etc.

- Mobile technologies: RxSwift, RealmDb for cache, Swinject for DI, Lottie for animations, UIKit Storyboard, Firebase, Test flight, Cocoa pods, Alamofire for Rest, Charts, XCTest for unit test, Appium for UI Test, Fastlane and Jenkins for CI.
- Patterns/Architecture: MVP-Model View Presenter, Clean Code, Use Case, Repository, Factory Provider, Spy test double, Mock Test.
- Other Tools: Miro, Abstract, Jira, Bitbucket, SAlFe, Scrum, SonarQube for Quality Code.

ELECTROLUX (VIA BLEND IT), REMOTE, BRAZIL
Global appliance company.

Aug-2020 / Nov-2021

IOS ENGINEER

Responsible for developing the revamp of the HomePlus App, an IoT project developed to connect with Electrolux's smart devices.

- Mobile technologies: SwiftUI, Combine, URLSession, Azure DevOps, Microsoft App Center, Firebase Analytics and Crashlytics, App Center to Distribute, Swift Manage Package, Cocoa pods, XCode, and JetBrains AppCode.
- Other Tools: Zeplin, OverFlow, AdobeXD.

WISER EDUCAÇÃO AND CARGILL (VIA SAMCORP) HYBRID, BRAZIL
A Software development company for customers in Brazil and Argentina.

May-2019 / Aug-2020

MOBILE ENGINEER

I worked as an Android and IOS Developer responsible for the maintenance of Android java/kotlin for Wiser Educação Group and helped to create a native video player for IOS. **My best project was creating a video player component based on Google Exoplayer for Android and AVPlayer for IOS** with the objective of reusing it on all apps, this allowed cost savings and reduced development time in many projects. I Developed the React Native Bridge of this player to be used in all React Native projects by other developers. Some of these applications have more than 120k active users.

- Mobile technologies: Android Studio, Java / Kotlin, Video and live streaming for HLS video format, Google ExoPlayer, Xcode, Swift, AVPlayer, Firebase Remote Config, Push notifications, React Native for Android/IOS bridge, BitBucket Pipeline, Fastlane, Firebase Analytics, Firebase Crashlytics.
- Local Database: RealmDb and Room framework to sync with the backend.
- Automated Test: Firebase TestLab and Android Espresso UI Test.

RSAC SOLUÇÕES, HYBRID, BRAZIL

Aug-2010 / May-2019

Consulting Company for ERP(Enterprise Resource Planning System) Totvs/Protheus (the biggest Brazilian ERP) helping the client to implement, customize, and integrate Web/Mobile solutions.

TECH LEAD / MOBILE ENGINEER

I worked as a tech leader, with 4 mobile developers, on projects for WMS-Warehouse Management System, Shop Floor, and inventory integrated with ERP Totvs/Protheus.

- As a Tech Leader, I've trained 2 Junior C# developers to start in our Team. Also implemented Source Control Versioning using GitLab in all projects and implemented a development process using Kanban to manage our tasks.
- As a developer, I finished projects in WinCE, WinMobile, Android with Xamarin and Java. Started the initiative to replace older WinCE by Android apps. This allowed the company to acquire new customers in 2018 because the total cost of the project was reduced by up to 60%.

ABACO IT, ON-SITE, BRAZIL

Jun-2006 / Aug-2010

Software house serving Brazilian government clients.

PROJECT MANAGER

Managed a 20-person engineering organization delivering 8 concurrent projects; recovered a \$250k at-risk project through re-planning and direct client negotiation. Foundation for the MBA in Project Management (FGV) and the subsequent transition into mobile engineering.

EDUCATION

MASTER BUSINESS ADMINISTRATION, Project Management

Fundação Getulio Vargas, Brazil, 2004-2005

POSTGRADUATE, Project Government Administration

Afirmativo college, Brazil, 2003-2004

GRADUATE, Software Development

IT COLLEGE OF CUIABÁ, BRAZIL, 1998-2001

1st best evaluated in the dissertation
